## CÂMARA MUNICIPAL DO SAL

### URAN PLANNING

#### PROGRAM 2. IMPROVEMENT OF URBAN INFRASTRUCTURE

#### -Sub-program 2.2.Upgrading and construction of services

Priority\*\*\*

### PROJECT FILE N° 2.2.4.

**PROJECT TITLE:** CHÃ DE MATIAS PRE-SCHOOL – ESPARGOS

**LOCATION:** Espargos, Sal

**PROJECT OBJECTIVES:** Improving urban services in the villlage of Espargos to ensure a more organized and efficient town.

**PROJECT DESCRIPTION:** Construction of a pre-school facility in the Espargos neighborhood of Chã de Matias.

**PROJECT JUSTIFICAITON:** The neighborhood of Chã de Matias is the most populated suburb of Espargos. The neighborhood consists of a young demographic and is comprised mostly of woman-headed households, many of whom have multiple children and are living in sub-standard conditions. In addition to these circumstances, there are currently no facilities for pre-school aged children.

The construction of the Chã de Matias Pre-School would serve as a large contribution to the development and enhancement of the Chã de Matias neighborhood. In particular the pre-school would significantly improve the living conditions and peace-of-mind of working parents with pre-school aged children in need of an appropriate place to safely leave their children while at work.

REPÚBLICA DE CABO VERDE

## CÂMARA MUNICIPAL DO SAL

The kindergarten will be a modern facility offering the habitable and safety conditions necessary to ensure the comfort of children in attendance. Special emphasis will be placed in assuring the facility is well-ventilated and functional.
